Customize Your 8000 Series Air Cleaner with up to Two Specialty Blends of Carbon!

With 32 pounds of carbon and medical-grade HEPA filter, the 8000 series of air purifiers are ideal for removing a wide range of Volatile Organic Chemicals (VOC's) and tough particles, to provide healthy indoor air for businesses and medium-sized industrial spaces.

Customize your units with the Exec blend of carbon for a wide array of odor and VOC adsorption. Choose the boosted Vocab blend of carbon for an even more aggressive removal of a full spectrum of VOC's.

- 32 pounds of the Exec or Vocab blend of activated carbon
- Removes dangerous chemicals, gases, odors and particles
- Cylindrical shape maximizes air flow
- Ideal for high traffic areas, or small to medium sized businesses
- Nylon wheels for easy maneuverability that won't mark floors

HVAC Option

Modify your 8000 series air purifier to be conveniently installed into a central HVAC system.
