ENZIS DELTA SUPPORT

**Description:**

The Enzis Delta Support is designed to support the track at two connection points with a single ceiling attachment. This distinctive design results in fewer required mounting points on the ceiling. By adjusting the distance between connection points the track drop from the ceiling can be modified, may be field cut. Standard wood screw provided for ceiling mount. No tools are required to attach the support to the track. Bruck recommends the Enzis Delta Support to be placed approximately every 6ft.
