Good Choice Bimetal

Features and Benefits

- Snap Action bimetal temperature control
- Industrial grade Micro Switch™ with extended life
- Color-coded wires assure easy installation
- Replaces most wall-mount line voltage thermostats
- Cover lock and temperature range stops (not included in bulk pack) govern min/max temperature setting
- Recommended for all baseboard and in-wall fan heaters

General Information:

The T410 bimetal thermostats are the most common and economical choice for wall mount, electric resistance heating. These thermostats use snap action bimetal temperature control and include an industrial grade Micro Switch™ with extended life. The T410 models can replace most wall-mount line voltage thermostats, are recommended for baseboard and in-wall fan heaters, and are available in single (2 wire) or double (4 wire) pole.

Architectural Information:

Thermostat shall be UL and CSA listed and be rated at 22 amps. The device shall be vented at top and bottom. Thermostat shall have bimetal sensor with snap action switching. Thermostat shall be factory sealed and calibrated. The cover shall be white, taupe, or almond and made of polystyrene material with two mounting screws provided.

Ordering Information: Available in white, taupe, or almond.

***Note:** Cover lock and temperature range stops not included in bulk packs. Bulk Packs must be ordered in full case quantities.
