

SELF-CLEAN WITH VIRTUALLY NO ODOR

Fresh Clean™ Oven Cleaning System

Cleans your oven without the odor or smoke of a conventional oven.

Fresh Clean™ is available on:

Induction Freestanding Range – E130IF40LS
Electric Freestanding Range – E130EF35JS

How Does it Work?

In a regular self-clean cycle, Hydrocarbons — also known as “VOCs” — are released into the home and produces a heavy odor and often eye, nose and throat irritation.

The Electrolux Fresh Clean™ filter captures the Hydrocarbons — and instead releases H₂O (Condensation) and CO₂, which are odorless and safe to breath.

It's made of Palladium and Titanium and heats up to 1000° F. Since the filter is self-cleaning, it never has to be replaced.
