

EW36IC60LS

36" Induction Cooktop

Also Available In:

 Black

FEATURES

More Responsive

Cooking with induction is more responsive than gas or electric — you can instantly adjust the heat to a delicate simmer or bring it to a quick boil.

More Energy Efficient

Cooking with induction is 70% more efficient than gas and 20% more efficient than electric.

7/11" Dual Element

Powerful and versatile element accommodates smaller cookware at a high level of performance, but with the same energy efficiency induction cooking provides. The 11" burner size provides up to 4,800 watts of power for larger pots and pans.

Exceptional Temperature Control

Adjust heat with greater accuracy than gas or electric cooktops, especially at lower settings. Perfect for melting chocolate and cooking delicate foods and sauces.

Cooking Flexibility

The sensors automatically detect the presence of magnetic cookware, activate the induction field, and adjust it to the exact size of the pan.
