SECURITY

www.firstwatchsecurity.com

It only takes 6 seconds to break into a typical garage.*

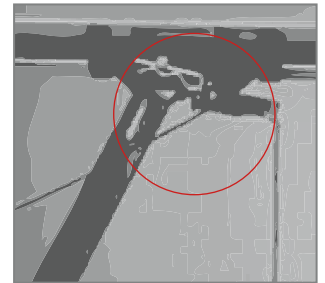

Every overhead garage door opener is equipped with a quick-release lever for emergency purposes.

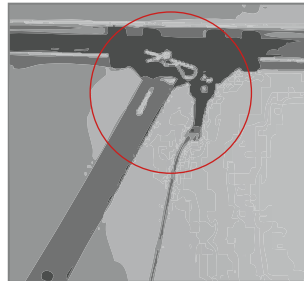

A wire coat hanger or a wire hook and six seconds are the only things a criminal needs to gain entry into your home, threaten your family, and destroy your peace-of-mind.

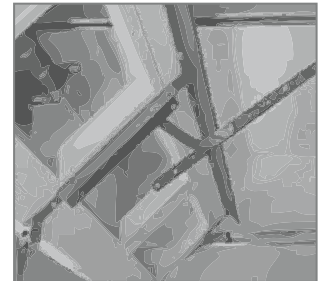

A wire hook is inserted through the door clearance

The wire hook grabs the release lever

The lever is released

The garage door opens

By far, the most common threat to your home is burglary. According to FBI statistics, a house, apartment or condominium is burglarized once every 15 seconds and most burglars enter via the front, back, or **garage** doors.

... this is how easy it can be for a burglar to break into your home

* See "breaking into a garage" on [youtube.com](https://www.youtube.com)

**It only takes 6 minutes to prevent this threat with
SECURESHIELD™ by First Watch® Security.**

SECURESHIELD™

SecureShield™ prevents overhead garage door break-ins. This patent pending design mounts around the emergency release lever and protects it from outside access. It is easy to install and works with most garage door openers. Intruders will no longer have the ability to enter your home, giving you peace-of-mind while keeping you, your home, and your family safe.

**Your family is worth protecting.
Ensure their safety with SecureShield™.**
