Drawing 1 - Fixture Mounting

Drawing 2 - Fixture Mounting
1
1. Find a clear area in which you can work.
2. Unpack fixture and glass from carton.
3. Carefully review instructions prior to assembly.

*** *The construction of this fixture will be accomplished by first attaching the mounting strap to the junction box, making all necessary electrical connections, mounting the fixture to the wall and then lamping the fixture.*
2
1. Prepare mounting strap **(A)** by threading the two 8-32 x 1 mounting screws **(B)** into the back of the mounting strap **(A)** - see **Drawing 1**.

• Be sure the holes into which the screws are threaded match the spacing of slots **(E)** on the top of internal assembly **(G)**.

2. Attach mounting strap **(A)** to junction box **(J)** by threading 2 screws **(C)** not provided into holes **(D)** of junction box **(J)**.

SAFETY WARNING: READ WIRING AND GROUNDING INSTRUCTIONS (I.S. 18) AND ANY ADDITIONAL DIRECTIONS. TURN POWER SUPPLY OFF DURING INSTALLATION. IF NEW WIRING IS REQUIRED, CONSULT A QUALIFIED ELECTRICIAN OR LOCAL AUTHORITIES FOR CODE REQUIREMENTS.
Note: This fixture requires two grounds to be connected. One on mounting bracket (A) and another on the back of fixture (B).

3
Make electrical connections from supply wire to fixture lead wires. Refer to instruction sheet **(I.S. 18)** and follow all instructions to make all necessary wiring connections. Then refer back to this sheet to continue installation of this fixture.

4
1. To mount fixture, remove outer housing **(F)** from the internal assembly **(G)** by unthreading top screw **(1)** and bottom screw **(2)**.

2. Slide slots **(E)** from the top back of internal assembly **(G)** over screws **(B)** on mounting bracket **(A)** - see **Drawing 1**.

3. Thread the two ball knobs **(3)** provided onto screws **(B)**.

4. Replace outer housing **(F)** by sliding it over internal assembly **(G)** and re-inserting top screw **(1)** and bottom screw **(2)**.

5. Fixture can now be lamped accordingly.
