ENERGYSTAR® qualified models exceed the Department of Energy standards for energy consumption by at least 25%. LG's Energy Star dishwashers allow consumers to save money, energy and protect the environment.

DISHWASHERS

Semi-Integrated Electronic Panel with Digital Status Display

Provides a beautiful exterior appearance while keeping you informed of the cycle status. Electronic controls ensure precise cleaning for safe dish care.

LoDecibel™ Quiet System

Enables you to talk on the phone or listen to the TV or the radio in your kitchen while the dishwasher is running. A combination of sound reducing material and the Slim Direct Motor™ ensures low noise.

SenseClean™ System

Measures turbidity in the water with an LED light during the first rinse. Then water and time are adjusted during the second cycle based on the need for more or less cleaning. This provides precise cleaning and water and energy efficiency.

Multi-Level Water Direction

Sprays water and detergent in five directions for even and thorough cleaning.

Hybrid Condensing Drying System

Uses a fan and condensation drying. The benefit is faster drying, reduced spotting and better energy efficiency.

Slim Direct Motor™

An innovative system that enables a clean transfer of energy that is highly reliable, durable, efficient and quiet. The compact size allows for more usable space in the tub.
