Assembly Instructions For

OL8107 (E) 12/11

IMPORTANT TURN OFF THE POWER AT THE MAIN FUSE OR CIRCUIT BREAKER BOX BEFORE STARTING INSTALLATION

Carefully unpack and identify all parts before assembly. Bulb not included.

- 1. Electrical installation onto post (not supplied): If you are replacing an existing fixture, disconnect and remove the old fixture.
 - A) Slip post cup over post. Mark position of hóles in post cup on post.
 - B) Remove post cup and expose the supply wiring from above post. Drill and tap a screw hole for the provided screw.
 - C) Connect white fixture wire to white supply wire from post with wire connector. Connect black fixture wire to black supply wire from post with wire connector.

NOTE: Black wire from post may be red, round and smooth and/or have copper conductor. White wire from post may be square and ridged and/or have a silver conductor.

- D) Connect fixture ground wire (without plastic insulation) to ground wire from post (usually with green insulation) with wire connector. IMPORTANT: Never connect ground wire to black or white supply wires.
- E) Tuck all wires inside of post.
- F) Slip post cup onto post. Align holes in post cup with holes in post. Secure them together by fastening with machine screws (enclosed).
- 2. Install light bulb (not included). See relamping label at socket area for type and maximum allowed wattage.
- 3. Install the bottom cover onto the main frame and fasten with screws.
- 4. Install the fixture loop on top of the cover.
