*When all lamp modules are installed

Specifications:

General

- 10 Gauge twin wire
- Designed for use with festoon-style LED lamp modules (P7814-30)
- Double ended sockets attached to wire on 12-3/8" centers, 5 sockets per linear foot.
- Sockets are wired such that any socket can be left empty and the others will still light
- Can be cut to desired length anywhere between sockets
- Can be spliced into desired lengths with wire nuts
- Attached to 12 volt secondary of an approved line voltage/12Vdc transformer
- Mounted with clear clips screwed into cove floor

Labeling

- UL-CUL listed
