WHIRLWIND

ZEPHYR WHIRLWIND

Zephyr's high performance hoods provide maximum ventilation for today's kitchens. All of Zephyr's ventilation products deliver two to three times the power of a conventional range hood. Designed for convenience and efficiency, the self cleaning feature eliminates the use of a restrictive baffle or mesh filtration unit. Manufactured with the highest quality in mind, Zephyr's innovative product line is ISO-9002 certified and carries a remarkable reputation in function, design, and warranty.

AK9800

AK9836

FEATURES

- High Performance 525 CFM
- Automatic Self Cleaning
- Dual Blowers
- High & Low Speed Selection
- Independently Controlled Blowers
- Interior and Wirings 100% Concealed from Cooking Residue
- Non-Stick Coating on Blowers and Housing
- High Quality 3 Mil Metal Construction with Powder Coat
- 20 1/2" capture

The Filter Free Advantage

All cooking residue and grease will be automatically liquefied within the sealed housing and drained into a pair of residue cups.

Cooking residue will no longer sift through filters and accumulate in motors and duct work which greatly reduces efficiency and performance over time.

Insures the lifelong performance on motors and prevents potential grease fires in duct work.

Saves time and cost by eliminating the need to replace expensive filters.

Self Cleaning Feature

Clean blowers by spraying '409' detergent directly into blowers once a month.

Remove safety grills, turn both blowers on Low speed, spray detergent into each blower (approx. 20-30 squirts) and allow to run for 5 minutes.

At the end of the cleaning cycle, all residue will be collected into the residue cups. Place cups and safety grills in dishwasher to clean.
