

# Delta Hand Shower Unit Installation Instructions

## 1. Remove Existing Shower Head

Turn the existing shower head counter-clockwise with adjustable wrench or pliers. Use care not to unscrew the shower arm; hold the shower arm secure. Remove any excess materials left on the shower arm. Note: If your shower arm has a ball on the end of it, it will not work with this shower unit and will need to be replaced with a standard shower arm.

## 2. Install Shower Mount/Connect the Hose to Shower Arm Mount

It is recommended to wrap Plumber Tape around the threads of the shower arm only. Place one rubber Washer into the end of the Shower Arm Mount that connects to the Shower Arm. Hand tighten the large end of the Shower Arm Mount clockwise onto the exposed shower arm threads until tight. Do not use a wrench or pliers.

**Installation:** One Washer, (provided) must be firmly seated into the bottom of the hose nut. Then firmly hand tighten the hose nut clockwise onto the Shower Arm Mount. Do not use a wrench or pliers.

## 3. Connect Hose to Hand Shower

Seat the Washer (provided) firmly into the other Hose nut. Carefully align the threads of the Hose directly to the Hand Shower. Hand tighten - do not use a wrench or pliers. Then place the Hand Shower into the Shower Arm Mount. Rotate the Shower Arm Mount into desired position, and tighten the retaining nut, to hold the Hand Shower.
