BOLERO DIAMOND SCONCE

Description:

Bolero glass is a free-blown glass that receives its shape directly out of the furnace. This Artisan process, executed by only Master Glass Blowers, guarantees each piece is one of a kind. The Bolero wall sconce may be mounted as an up-light or a down-light. The wall sconce may be mounted as a square or at an 45 degree angle to create a diamond shape. The metal canopy and stem is available in bronze. A 75W dimmable electronic transformer is included on the mounting plate.
