READ AND SAVE THESE INSTRUCTIONS

SAFETY FIRST

Safety and the proper operation of your Casablanca fan both require a thorough knowledge of the product and proper installation; therefore, before attempting to install and operate your Casablanca fan, read this owner's manual completely and carefully. Retain this manual for future reference.

CAUTION: To avoid possible electrical shock, make certain that electricity is turned off at the circuit breaker or fuse box before attempting any installation procedure.

BEFORE YOU START

- **CAUTION: RISK OF ELECTRICAL SHOCK!** All wiring must be performed in accordance with national and local electrical codes. If you are unfamiliar with the wiring codes, you should use a qualified electrician. To avoid overheating and possible damage to other equipment, do not install control to a receptacle, fluorescent light fixture, motor operated appliance, or transformer-supplied appliance.
- This fan is designed to be installed on an existing electrical outlet box. The outlet box must be UL Listed for ceiling fan installations, if it is not, a new box must be installed. Casablanca extension poles are available for sloped or high ceiling installations.
- This ceiling fan requires a grounded electrical supply of 120 VAC, 60 Hz and a minimum 15 amp circuit. The maximum current requirement for the fan with light fixture is 3.8 amps. The fan uses about 1 amp or 100 watts. Maximum light current is 2.8 amps or 340 watts of lighting.
- Where wire nuts are employed, be sure all bare wires are within the connectors. When installing the canopy hatch, make sure all wires are within the canopy and that no wires are being pinched.

For best performance and for your warranty to be valid, use only genuine Casablanca blades, light fixtures, and accessories.

SAFE USE

- The blades in each pack are matched for equal weight to assure smooth fan operation. If more than one fan is being installed, be careful not to mix blades from different cartons.
- Inspect the contents of your carton for possible shipping or handling damage and report any such damage directly to your authorized Casablanca dealer.
- It is always a good idea to have an assistant to help with the installation.
- When cleaning, painting, or working near your fan, be very careful of the fan and blades. Always turn the power OFF to the ceiling fan before servicing it, working on it, or replacing light bulbs.
- Never insert anything into the path of the fan blades while the fan is in operation.
- Never install a fan over a pool or spa.
- Never operate a fan that has been damaged in any way. Contact Casablanca Fan Company by calling toll free 1-888-227-2178, or contact your local authorized Casablanca dealer for assistance in obtaining service.

CIRCUIT YOU WILL BE
WORKING ON)

MOUNTING RECOMMENDATIONS

Before mounting your Casablanca fan, read the following helpful recommendations. The location of the fan, air circulation, and fan size are all important factors to consider before installation.

Location

Ceiling fans have practical uses in almost every room in your home. We suggest you follow these mounting recommendations as you decide where to install your Casablanca fan.

- For safety reasons, the fan blades must be a minimum of 7' above the floor.
- Do not locate the fan in a doorway or above a swinging door.
- In any installation, the tips of the blades must be at least 18" from the wall in order to provide sufficient clearance for the blades.
- In bedrooms, fans work best when mounted above the foot of the bed.
- Over pool tables, be sure to provide plenty of clearance to avoid damage from pool cues.
- In low ceiling locations, our optional Low Ceiling Adaptor (LCA)—available at extra cost—can be used to gain 3¹/₂".
- In kitchens be sure to allow for open cupboard doors to clear the fan blades.
- Do not install a fan close to, or over, a pool or spa. High humidity combined with corrosive gases will destroy the finish and warp the blades.

Fan Size

Variable fan speed capability permits the use of a full-size 52" fan even in smaller rooms. For very large rooms, two fans may be needed.

SLOPED CEILING INSTALLATIONS

| Suggested Extension Pole Lengths | |
|----------------------------------|-------------|
| Ceiling Height | Pole Length |
| 8' | Standard |
| 8' 6" | Standard |
| 9' | 6" |
| 9' 6" | 12" |
| 10' | 12" |
| 11' | 18" |
| 12' | 24" |
| 13' | 36" |
| 14' | 48" |

When to Use Extension Poles

For best performance and best appearance, an extension pole should be used with your Casablanca fan when installing on high (cathedral) ceilings or sloped ceilings. Casablanca offers standard poles in increments of 6" up to 5'. Custom poles are available in lengths up to 10'. See your Authorized Casablanca Dealer for details.

Note: Fan may wobble or vibrate if pole length is not long enough and inside blade is too close to downslope or side wall. Extending pole length will usually solve problem.

EXAMPLE 1

This slope is less than 32°. It is OK to install your fan.

EXAMPLE 2

This slope is 32°. This is the maximum slope that will allow the fan to hang straight down. It is OK to install your fan.

EXAMPLE 3

This slope is more than 32°. Your fan will not hang straight down, an adaptor is necessary. Contact your local Authorized Casablanca Dealer in regards to purchasing a "Slope Ceiling Adaptor."

Calculation of 32°

Use the tear-off *Ceiling Angle Template* card inserted in the back of this manual, it provides you with a simple 'go' or 'no-go' for installing your fan on a sloped ceiling.

INSTALLATION INSTRUCTIONS

Unpacking: Before assembling and installing your ceiling fan, remove all parts from the shipping cartons and check them against the parts listed here. Before discarding packaging material, be certain that all parts have been removed.

PERMA•LOCK™ HARDWARE

ALLEN SET SCREW
1/4-20 x 1/4"
(PRE-INSTALLED)

3mm
ALLEN WRENCH

DOWNROD & BALL
ASSEMBLY

FAN PREPARATION

IMPORTANT SAFETY INFORMATION!

BEFORE STARTING THE INSTALLATION OF YOUR CEILING FAN, INSTALL THE THREADED DOWNROD INTO THE MOTOR COUPLING AND LOCK THE ASSEMBLY

Prepare for fan installation as follows:

Step A. Route the wires from the motor through the Perma•Lock™ downrod and ball assembly.

Tip: The downrod has a tapered thread that is designed to lock completely when correctly installed.

Step B. Using the provided allen wrench, loosen the set screw several turns to allow installation of the downrod. Thread the downrod into the motor coupling until it stops turning, this will take at least four and a half full turns.

Step C. Securely tighten the set screw with the provided allen wrench to ensure safe operation of your fan.

CAUTION: Failure to fully lock in the downrod before securely tightening the allen set screw may cause the fan to separate from the downrod during normal operation!

GETTING STARTED - CONTINUED

Installing a New Ceiling Fixture Outlet Box

If you do not have an existing fixture located where you wish to place your Casablanca fan, an approved ceiling fixture outlet box must be installed and wired.

Warning: To reduce the risk of fire, electrical shock, or personal injury, mount to outlet box marked acceptable for ceiling fan support.

Using Existing Ceiling Fixture Outlet Box

After turning the power OFF at its source (either circuit breaker or fuse box), lower the old fixture and disconnect the wiring. Check the ceiling fixture outlet box to be sure that it is marked 'Approved for ceiling fan mounting'. If it is not, a new box must be installed.

CROSSBAR MOUNTING BRACKET INSTALLATION

Proceed with installation as follows:

Step 1. Route the wires from the ceiling outlet box through the crossbar mounting bracket center hole. Attach the bracket, with ground wire and ridges down, to the 'Approved For Ceiling Fan Installation' ceiling fixture outlet box with the outlet box mounting hardware.

Tighten the screws firmly, being careful not to bend the bracket by over tightening.

CAUTION: To reduce the risk of personal injury, use only the mounting hardware provided with the approved outlet box to install the crossbar mounting bracket.

CANOPY HARDWARE

CANOPY HATCH

CANOPY

CANOPY INSTALLATION

Step 2. Attach the canopy to the crossbar mounting bracket with three of the 8-32 x 2 1/2" long canopy screws and canopy lock washers. Hand tighten until snug against the ceiling.

Note: On sloped ceilings, align the canopy opening towards the top or room peak.

HANGING THE FAN

Step 3. To hang the fan body in the canopy, hold the fan body firmly and insert the nylon ball into the canopy opening. Check that no wires were pinched. Rotate the fan body until the slot in the nylon ball fits into the pin opposite the canopy opening.

Note: Fan weighs 25lbs.

CANOPY ELECTRICAL CONNECTIONS

Step 4. Attach the fan wires to the ceiling fixture outlet box wiring by twisting the bare ends of the wires together and then securing with a wire nut. Test that the connection is secure by pulling on the wire nut. Connect in this order:

Electrical Connections

- GREEN leads from mounting plate and fan to GROUND conductor of power source. Secure with wire nut.
- WHITE wire from fan to white NEUTRAL wire in ceiling fixture outlet box. Secure with wire nut.
- BLACK power wire from fan to BLACK power wire in ceiling outlet box. Secure with wire nut.

CANOPY HATCH INSTALLATION

Step 5. Tuck the wires into the canopy with the wire nuts pointed upwards, so that the WHITE and BLACK wires are on opposite sides of the canopy and all wires are clear of the canopy opening.

Step 6. Install canopy hatch with the last canopy screw and lock washer. To do this, tilt the fan body away from the hatch opening. Tighten the screws firmly by **hand** only,

Step 7. Straighten the fan, then check to ensure that there is no movement between the canopy and ceiling or Hang-Tru ball and top support shaft.

Note: Write down the Serial Number and the model number for future reference.

BLADE HOLDERS & HARDWARE

 **BLADE HOLDER SCREW**
(2 PER BLADE)

 **BLADE SCREW**
(4 PER BLADE)

ASSEMBLE BLADE HOLDER & BLADE

Step 8. Attach the blades to the blade holders by first pressing the blade badge into the blade, then installing the blade holder using the four blade screws provided for each blade.

Hand tighten securely.

BLADE SCREW
(4 PER BLADE)

BLADE/BLADE HOLDER INSTALLATION

Step 9. Rotate the flywheel so that the screw holes can be accessed through the recessed area of the metal plate.

Attach each blade/blade holder assembly to the motor.

Tighten securely by **hand** only.

4/5 Blade Combination Flywheel

Your Casablanca fan includes our 4/5 combination flywheel. This flywheel accommodates your preference to use either 4 or 5 blades on your fan. If you desire a 4-blade fan, locate the square counterbores on the flywheel and use these threaded holes to mount the blades. If you desire a 5-blade fan, locate the round counterbores on the flywheel and use these threaded holes.

□ = 4-blade mounting hole ○ = 5-blade mounting hole

BLADE HOLDER SCREW
(2 PER BLADE)

PREPARING TO INSTALL SWITCH HOUSING CAP

Step 10. Remove the three screws on the mounting plate.

Set aside for Step 12.

INSTALLING THE SWITCH HOUSING CAP

Step 11. Line up the three threaded holes in the rim of the switch housing with the three clearance holes in the mounting plate. Carefully slide the switch housing into the mount so that the threaded holes are directly behind the clearance holes.

Step 12. Install the three screws removed in Step 10.

Tighten securely by *hand* only.

INTELI-TOUCH INSTALLING THE W-32 WALL CONTROL

The wall control installs in the same manner as an ordinary light switch, using an existing junction box and wiring. This controller is designed to signal the fan microcomputer as well as perform normal switching operations. For this reason the following precautions must be observed:

1. Use **only** the Casablanca W-32 wall control.
2. Do not use any additional control with your Inteli-Touch fan (for example, dimmer, fan speed control, etc.).
3. Do not use more than **one fan per wall control**.
4. No other light fixtures or electrical appliances may be connected on the circuit controlled by the W-32 wall control.

INTELI-TOUCH SINGLE W-32 INSTALLATION

CAUTION! Ensure power is turned OFF at the breaker or fuse panel before starting installation.

W-32 is used to describe either white (-11) or ivory finish.

1. Remove the screws and switch plate from the existing switch box.
2. Remove the screws holding the switch in the switch box.
3. Pull the existing switch from the switch box to expose the wire connections.
4. Remove the two wires from the switch.
5. Connect the two wires just removed from the switch to the W-32 wall control black wire and black/white stripe wire. Secure these connections with wire nuts.
6. Connect the green ground wire coming from the back of the W-32 control to the ground wire in the switch box. Secure the splice with a wire nut.
7. Install the W-32 in the wall box with the two long screws provided.
8. Install the wall plate with the two color matched screws.

NOTE: If wall control operation is reversed (fan switch controls lights and light switch controls fan) turn off the power at the breaker or fuse panel, then swap the two W-32 black/white stripe wires.

NOTE: This product has been evaluated and is suitable for Solid State Speed Controls.

INTELI-TOUCH DUAL W-32 INSTALLATION

CAUTION! Ensure power is turned OFF at the breaker or fuse panel before starting installation.

To control the fan and lights from two locations (a three-way circuit), use 2 W-32 wall controls.

1. Remove the screws and switch plate from the existing switch box and the screws holding the switch in the switch box.
2. Pull the existing switch from the switch box to expose the wire connections.
3. Determine which wire is connected to the common terminal of the 3-way switch. (The terminal will be marked on switch).
4. Remove the wire from the common terminal of the 3-way switch. Connect this wire to the remaining black/white striped wire on the W-32 control. Secure this splice with a wire nut.
5. Remove the two remaining wires from the 3-way switch. Connect one of these wires to a black wire on the W-32 control. Secure the splice with a wire nut. The remaining wire is to be connected to the other black wire on the W-32. Secure the splice with a wire nut.
6. Connect the green ground wire coming from the back of the W-32 control to the ground wire in the switch box. Secure the splice with a wire nut.
7. Install the W-32 in the wall box with the two long screws provided.
8. Install the wall plate with the two short color-matched screws provided.
9. Installation of the second W-32 control is identical. Repeat steps 1 through 7.

NOTE: If wall control operation is reversed (fan switch controls lights and light switch controls fan) turn off the power at the breaker or fuse panel, then swap the two W-32 black/white stripe wires.

INTELI-TOUCH OPERATION POWER

The **POWER** button is normally left in the on position. Always turn the power off during cleaning or servicing the fan and during thunderstorms. It is also used to exit or enter additional programs.

POWER must be left on to retain a previously set fan speed or light level.

INTELI-TOUCH OPERATION SPEED CONTROL

There are six individual speed settings for the fan; each speed is indicated by an audible tone of increasing pitch.

To select the desired fan speed:

1. With fan off, press and hold the button labeled **FAN**. The fan blades will start rotating at the slowest speed, and will increase in steps.
2. Release the button when the desired speed is reached.

The fan speed is now in memory and will automatically come on at the same speed each time the **FAN** button is used. To maintain this level of speed, turn the fan on by pressing **FAN** less than one second. To lower speed, turn fan off, then on by pressing and holding the **FAN** button until the desired speed is reached. When the fan is on, you may increase the speed by pressing and holding the **FAN** button until the desired speed is reached, then release it.

FAN CONTROL

ON - OFF
A momentary press of the **FAN** button

TO CHANGE SPEED
Press and hold **FAN** button longer than one second

INTELI-TOUCH · REVERSING AIRFLOW

The direction of airflow can be changed from downward to upward or from upward to downward.

To reverse the airflow:

1. Make sure the **FAN** is on.
2. Press the **REVERSE** button.

Note: A four-toned signal indicates the command was accepted by the fan. A few seconds later the fan will slow to a stop and then reverse direction.

INTELI-TOUCH LIGHT

To turn the lights off and on, press and release the **LIGHT** button for less than one second.

To vary the light brightness:

1. With lights off, press and hold the **LIGHT** button. After one second the lights come on at their lowest level and gradually become brighter.
2. Release the button when the desired brightness level is reached.

The brightness level is now in the fan memory and will automatically come on at the same brightness the next time the **LIGHT** button is used. To maintain this level of brightness, press the **LIGHT** button for less than one second. To lower the brightness, turn the lights off, then press and hold the **LIGHT** button until the desired brightness level is reached. When the light is on, you may increase the brightness level by pressing and holding the **LIGHT** button until the desired level is reached, then release it.

LIGHT CONTROL

ON - OFF
A momentary press of the **LIGHT** button

TO CHANGE BRIGHTNESS
PRESS AND HOLD **LIGHT** BUTTON LONGER THAN ONE SECOND

AUTOMATIC DEMONSTRATION PROGRAM

Programmed into every Intelli-Touch Series fan is an Automatic Demonstration Program. It can be used to fully demonstrate and test the operation of the fan.

To enter the demonstration program:

1. Turn **POWER** off for at least three seconds. This will clear the fan memory ready for programming.
2. Turn **POWER** on.
3. Immediately operate the buttons in the following sequence:

A multi-tone signal will verify the start of the test program which proceeds as follows:

- Lights slowly increase to full intensity.
- Fan accelerates to speed three with audio tones.
- Light dims to half intensity.
- Fan accelerates to full speed with audio tones.
- Fan reverses at full speed with audio tones.
- Fan operates at full speed.
- Fan power is reversed with audio tones.
- Fan turns off with audio tones (blades coast for a short time).
- Lights turn off.

The complete cycle lasts slightly over one minute. It will continue to repeat until the **POWER** is turned off for more than three seconds, cancelling the program.

Inteli-Touch®

INTELI-TOUCH OPERATION LIGHT-MINDER PROGRAM

The Light-Minder program automatically turns OFF the fan mounted lights after two hours.

To enter the Light-Minder Program:

1. Turn the **POWER** OFF for at least three seconds.
2. Turn the **POWER** on.
3. Immediately operate the buttons in the following sequence:
   
4. A series of tones indicates this command has been accepted.

The fan and light will operate normally using the buttons to turn them on and off. But, if the lights are left on, they will automatically shut off after two hours. To cancel the Light-Minder Program, turn the **POWER** off for three seconds.

INTELI-TOUCH OPERATION SAFE-EXIT PROGRAM

The Safe-Exit Program gives you about thirty seconds of light when you turn the lights off, enabling you to exit your home before the lights go out.

To enter the Safe-Exit Program:

1. Turn the **POWER** off for at least three seconds.
2. Turn the **POWER** on.
3. Immediately operate the buttons in the following sequence:
   

After you hear the confirming audio tones from the fan - **immediately press**

4. The lights will blink to indicate this command has been accepted. The lights will stay on for twenty seconds and then begin to dim. After a total of thirty seconds has elapsed, the lights will be off completely. To cancel the Safe-Exit Program, turn the **POWER** off for three seconds.

Note: Both Light-Minder and Safe-Exit programs can run at the same time, however the dimmer cannot be used, the light may only be turned ON/OFF.

INTELI-TOUCH OPERATION HOME-SAFE® PROGRAM

The Home-Safe Program makes an unoccupied home appear occupied by turning the lights on and off at random times.

To enter the Home-Safe Program:

1. Turn the **POWER** off for at least three seconds.
2. Turn the **POWER** on.
3. Immediately operate the buttons in the following sequence:
   
4. A tone and flashing light indicate this command has been accepted.

This program overrides all manual control of lights and fan. The lights will now be automatically cycled on and off in a controlled sequence as follows: On 1 hour, off 1/2 hour, on 2 hours, off 1 hour, on 1/2 hour then off 2 hours.

This seven hour pattern will repeat continuously so that a different pattern of lighting is seen each day of the week.

To cancel the Home-Safe Program, turn the **POWER** off for three seconds.

INTELI-TOUCH OPERATION FAN-MINDER® PROGRAM

The Fan-Minder feature will add to your comfort when used in the bedroom. The program reduces the speed of the fan each two-hour interval to compensate for the cooling night air.

To enter the Fan-Minder Program:

1. Turn the **POWER** off for at least three seconds.
2. Turn the **POWER** on.
3. Immediately operate the buttons in the following sequence:
   
4. The fan controller will respond with three descending tones. A timer is now initiated and the fan will reduce one speed for each two-hour interval. The fan will not, however, descend below the second lowest speed.

To cancel the Fan-Minder Program, turn the **POWER** off for three seconds. You may increase the fan speed by pressing and holding the **FAN** button until the desired speed is reached, then release it. The fan will again reduce one speed for each 2 hour interval.

TROUBLESHOOTING

Before Requesting Service: Please follow this troubleshooting guide before contacting your dealer for assistance.

Caring for Finishes: For cleaning, a soft brush or lint-free cloth should be used to prevent scratching the finish. A vacuum cleaner brush nozzle can remove heavier dust. Surface smudges or an accumulation of dirt and dust can easily be removed by using a mild detergent and slightly dampened soft cloth. An antistatic agent may be used, but **never** use abrasive cleaning agents. These will damage the finish. Painted and high-gloss blades may be cleaned in the same manner.

Blades: Wood finish blades should be cleaned with a furniture polishing cloth. Occasionally, a light coat of furniture polish may be applied for added protection and beauty.

Never Lubricate this Fan!

The precision motor at the heart of your Casablanca fan features sealed bearings that are lubricated for life. Do not attempt to oil the motor.

Changing Light Bulbs

Be sure to turn power to the fan OFF at the wall switch or circuit breaker before changing light bulbs. Replace bulbs with same type as removed from the fixture. Each fan is rated for a maximum **TOTAL** wattage of lighting.

In compliance with US Federal Energy Regulations, this ceiling fan contains a device that restricts the light kit to a maximum of 190 watts. Exceeding that limit or the marked limit on this product may result in a fire hazard or improper operation.

| PROBLEM | INTELI•TOUCH | POSSIBLE REMEDIES |
|---------|--------------|-------------------|
|---------|--------------|-------------------|

| | | |
|------------------------|--|--|
| NO FAN OR LIGHT | Check main circuit fuses, curcuit breakers, or wall switch position. Check all wire connections, making sure the power is turned off during this inspection. | |
|------------------------|--|--|

| | | |
|--|---|--|
| FAN WOBBLER OR SHAKES EXCESSIVELY | Be sure canopy pin is properly set into the slot on the ball Check the screws holding the blade holders to the fan motor. Tighten as necessary. Check the angle of the blades to make sure that a blade holder has not been bent during installation. | |
|--|---|--|

| | | |
|-----------------------------------|--|--|
| FAN NOISY DURING OPERATION | Check and tighten light fixture retaining screws, glass shade screws and/or the light bulb(s). Tighten canopy screws and mounting plate assembly. Tighten the blade to bladeholder screws and blade holders to flywheel. Make sure all screws in the motor housing are snug, but not overly tight. Check that the wire nuts inside the canopy and switch housing are not touching the metal parts or have fallen off the wire splices. Tighten or adjust as necessary. | |
|-----------------------------------|--|--|

| | | |
|------------------------|---|--|
| BREAK-IN PERIOD | Let fan run at high speed for two (2) hours | |
|------------------------|---|--|

| | | |
|----------------------------------|---|--|
| DOES NOT RUN ON LOW SPEED | If new, "break-in" may be required - run at higher speed for several days | |
|----------------------------------|---|--|

LIGHTS FLASH OR BLINK DURING OPERATION OF W-32 WALL CONTROLS/FAN MAY ROTATE OR MAKE AUDIBLE TONES DURING OPERATION OF THE W-32 WALL CONTROLS: Normal operation.

WHEN AC POWER IS TURNED ON FOR THE FIRST TIME, THE LIGHTS OPERATE NORMALLY, BUT W-32 WALL CONTROL OPERATION IS REVERSED: FAN BUTTON OPERATES THE LIGHTS; LIGHT BUTTON OPERATES THE FAN: Reverse the 2 black and white striped wire connections.

FAN OR LIGHTS APPEAR TO OPERATE BY THEMSELVES (CHANGING SPEED OR INTENSITY), WALL CONTROL OPERATION IS INTERMITTENT: Check AC supply for irregularities, (noise spikes, fluctuations, or failure); or circuit board assembly.

PRODUCT SPECIFICATIONS

Model Name: Metropolitan®
Model Number: 64xxT

Dimensions:
A = 12"
B = 12.2"
C = 3"
D = 12"
E = 5.6"

NOTE: Dimension B includes light fixture and glass.

Weight: 25 lbs.

Motor: XLP-2000®
Blade Span: 44" & 54"
Blade Iron Pitch: 15°
No. of Blades: 5
Technology: Intelli•Touch® W-32

Airflow: 6,003 cfm
Electricity Use*: 119 watts
Airflow Efficiency*: 50.5 cfm/watt

* Performance data is for fan only. No lighting wattage is included. Measurements taken with 21" basic blades.
