

Undercounter Wine Cellar

HWC241 | HWC242

Temperature Control

- All bottles are preserved under stable humidity and temperature conditions as they are evenly distributed throughout the unit with DynamicClimate mode
- Efficient cooling is achieved through the use of R600a refrigerant which is not only 40% more efficient than the traditional coolant, but also much more environmental friendly

Design

- Shields wines from harmful UV rays with dual paned, UV resistant tempered glass door
- For seamless integration into surrounding cabinets, our wine cellars can be installed flush under cabinets

Convenience

- Keeping cold air in, door closes softly ensuring tight closure with our self closing hinges
- Capable of holding up to 45 bottles (dual zone)/ 54 bottles (single zone)

Craftsmanship

- Precise and even cooling performance along with luxurious detailing promoted by our stainless steel interior
- Prevents vibration and damaging wine labels through luxurious beechwood EasyGlide™ racks
