

Nugget Ice...
Manitowoc makes it
easy to chewz!

Need chewable ice?

It's easy to chewz with Manitowoc nugget ice!

Tubular nugget ice is cylindrically shaped with a 5/8" diameter and average length of approximately 1". Its unique shape offers a soft, chewable texture while maintaining maximum cooling ability.

Manitowoc offers tubular ice in RN Series modular ice machines with up to 1,200 lbs. of daily ice production. With longer pieces and 90% ice quality, tubular nugget is ideal for dispensing applications reducing the potential for congealing ice and minimizing drink dilution. High capacity dispensing make these ideal for convenience stores and restaurant settings.

Nugget ice provides a high quality, soft, chewable texture while still providing maximum cooling effect. Small pieces ranging from 3/8" to 1/2" width and length on average make up Manitowoc nugget ice.

Manitowoc offers nugget ice in three options: undercounter, modular and ice/water dispensers with production ranging from 130 to 350 lbs. of daily ice production. The RNS series of nugget ice machines features a 90% ice to water ratio for minimal beverage dilution. Small nuggets of ice make these ice machines perfect for drink dispensing, ice packs, blended beverages and ice/water needs.

Nugget ice...dispense it or scoop it!
