**CAUTION: FAILURE TO INSTALL THIS FIXTURE PROPERLY MAY RESULT IN SERIOUS PERSONAL INJURY OR DEATH AND PROPERTY DAMAGE. We recommend installation by a licensed electrician.**

This product must be installed in accordance with applicable installation code(s), by a person familiar with the construction and operation of the product and the hazards involved.\*

**Caution:** Do not exceed maximum wattage noted on fixture. Use only recommended bulbs with fixture.

## To Install the Canopy (Figure 1)

### Component Parts

A	Ground Screw	F	Loop Collar
B	Crossbar	G	Canopy Loop
C	Lock Nut	H	Fixture Loop
D	Nipple	I	Chain
E	Canopy		

**Caution: Be sure power is off at the main breaker box prior to installation**

1. Carefully unpack the fixture from the carton.
2. Using two machine screws (not provided), fasten the crossbar (B) to the electric box (see illustration).  
**Note:** A new electric box comes with screws. When replacing a fixture, retain the existing screws for use with the new fixture.
3. Thread the nipple (D) into the crossbar (B) and secure with lock nut (C); slide canopy (E) over nipple (D), and attach the canopy loop (G) to the nipple (D). Adjust the nipple to proper length to ensure a snug canopy fit before proceeding.
4. Attach one end of the chain (I) to the fixture loop (H). Lace the wire through every other link of the chain (I) to the end. Slip wires and chain (I) through the collars and canopy (G, F & E). Fasten the chain (I) to the canopy loop (G), and then slip slip wires through the loop and nipple, into the electric box. Make sure to provide enough slack in the wire to ensure weight of fixture is supported by the chain (I).
5. Using suitable wire connectors (not provided) connect fixture wires to supply wires (white to ribbed side of the fixture cord, black to smooth side). Run a pigtail lead from crossbar ground screw (A) to the junction box and connect all ground wires (bare copper or green to bare copper or green).

**Caution:** Make sure wire connectors are twisted on securely, and no bare wire is exposed.

6. Raise canopy (E) to the ceiling and secure loop collar (F) to canopy loop (G).
7. Follow instructions on next page to install glass.

(Figure 1)

## To Install Single Glass Option (Figure 2)

### Component Parts

- J Socket
- K Bulb (Included)
- L Glass
- M Retaining Ring
- N Retaining Ring Tool

1. Remove retaining ring (M) from socket (J) and retain.  
*Retaining ring ships installed.*
2. Install light bulb (K). Be careful not to touch bulb with bare hands; oil from the hands will dramatically reduce bulb life.  
**Note:** *The bulb included is based on our design preference; see the fixture wattage sticker for Max wattage information.*
3. Slip glass (L) over socket (J) and thread retaining ring (M) onto socket (J) using provided retaining ring tool (N).
4. Repeat steps 1-4 for remaining sockets.
5. Restore electricity at main breaker.

(Figure 2)

## To Install Double Glass Option (Figure 3)

### Component Parts

- J Socket
- K Bulb (Included)
- L Glass
- M Retaining Ring
- N Retaining Ring Tool
- O Inner Glass

1. Remove retaining ring (M) from socket (J) and retain.  
*Retaining ring ships installed.*
2. Install light bulb (K). Be careful not to touch bulb with bare hands; oil from the hands will dramatically reduce bulb life.  
**Note:** *The bulb included is based on our design preference; see the fixture wattage sticker for Max wattage information.*
3. Place inner glass (O) inside glass (L) and then slip glass (L) over socket (J). Thread retaining ring (M) onto socket (J) using provided retaining ring tool (N).
4. Repeat steps 1-4 for remaining sockets.
5. Restore electricity at main breaker.
